Agenda:

1. General discussion about the present invention and its novel features. –
Specifically, we will address the nature of a schema within the context of
an inbox document system.
2. Discussion about how the claims seek to capture the novel features.
a) Claim 4 -- *...receiving a request to retrieve inbox data, the request
including associated identity information;
reading from a data store to obtain inbox data based on the
associated identity information;
constructing an inbox document including at least part of the data,
the document arranged according to a defined schema for inbox data in a
markup language; and
returning the document in response to the request.*
3. Discussion about how the cited and applied references fall short of
teaching the claimed subject matter.
